REVISION OF WEEKLY INDEX NUMBERS OF SECURITY PRICES

A change recently made in the method of computing weekly Investors' Index numbers of common stock prices, has removed the bias between weekly and monthly figures. For certain sub-groups this had grown to serious proportions. In place of the usual chain type of comparison formerly employed, these two series are now computed from base aggregates common to both. When the list of stocks included in the index numbers is revised, the base aggregates will be adjusted to maintain continuity. This revision affects only the weekly index numbers which were responsible for the bias that had developed.

WEEKLY INDEX NUMBERS OF WHOLESALE PRICES, 1934-1935
(1926=100)

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926=100 declined from 72.5 for the week ending May 17 to 72.4 for the week ending May 24. Price changes were comparatively few and somewhat irregular. Products of the farm tended downward but the Non-Ferrous Metals group moved upward to a new peak for the year.

Vegetable Products dropped from 68.3 to 67.9. Raw rubber was fractionally stronger but flour and milled products, and vegetables were lower. Favourable crop conditions in the Canadian West have placed pressure upon grain prices during the past five weeks. Animal Products were firmer when gains in fresh meats, cured meats and eggs proved by more importance than recession in livestock and milk products, and the index advanced from 70.1 to 70.2. Livestock sales for the week were approximately twenty-five percent less than for the previous week and prices were lower. It is noteworthy that cattle bought for export to the United States numbered more than fifty percent of the total sales of cattle reported from public stock yards. Non-Ferrous Metal prices continued upward and the index rose from 71.3 to 71.9. Copper, lead and tin were higher and silver averaged better for the week. Slight changes in asbestos products among Non-Metallic Minerals lowered the index for this group from 85.5 to 85.3 and Textiles, Wood, Iron and Chemicals remained unchanged at 70.6, 63.9, 87.4 and 80.1 respectively.

Canadian Farm Products decreased from 64.5 to 64.1. Weakness in grains was the chief reason for Field Products falling from 58.4 to 58.0 while lower prices for livestock were mainly responsible for reducing Animal Products from 74.7 to 74.4.

WEEKLY INDEX NUMBERS OF WHOLESALE PRICES, 1934-1935.
(1926=100)

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926=100 fell from 71.9 for the week ending May 31 to 71.8 for the week ending June 7. With few exceptions, price changes were downward and indications of uncertainty were in evidence on many of the commodity markets. Buyers appeared to have assumed a waiting attitude pending more definite developments in the business situation.

Vegetable Products declined from 66.8 to 66.6. Grains with the exception of barley and rye were lower, and raw sugar, coffee and vegetable oils lacked stability. Shipments of livestock to the United States were in good volume, and the number of cattle exported so far this year exceeded by approximately eight thousand the total number exported in 1934. Prices, however, were lower for both livestock and meats. Reductions in fish, hides and milk products helped to decrease the Animal index from 69.7 to 69.4. Seasonal decline in business activity has tended to affect the statistical position of industrial commodities adversely with a resultant depressing effect upon price movements. This was apparent in the weakness of Non-Ferrous Metals which were generally lower. The index for this group dropped from 71.3 to 69.9. Price changes in Textiles, Wood Products, Iron, Non-Metallic Minerals and Chemicals were not of sufficient importance to alter these indexes which remained at 70.3, 63.9, 87.4, 85.4 and 79.9 respectively.

Canadian Farm Products moved down from 62.9 to 62.5. Weakness in grains, hay and potatoes reduced the index for Field Products from 56.0 to 55.8. Recessions in livestock and hides and skins were of more importance than increases in eggs and wool and the index for Animal Products declined from 74.4 to 73.7.

Milling excepted, several sub-groups of Industrials showed sharp declines. Consequently the index of 87 Industrials dropped from 148.7 for the week of September 19th to 144.8 for the week of September 26th. In 1934, for the week ending September 27th, the index was 146.1. Of the three groups included in the Investors', Utilities registered the largest decline, causing the index to drop from 46.7 for the week of September 19th to 45.2 for the week of September 26th. For the corresponding period of last year, this index was 50.3. Due to a heavy loss in the price of Brazilian and International Petroleum, an index for five companies located abroad fell from 120.6 for the week of September 19th to 117.2 for the week of September 26th. The index recorded for September 27th, 1934, was 105.4.

WEEKLY INDEX NUMBERS OF DOMINION OF CANADA LONG-TERM BOND YIELDS.
(1926=100)

During the week ended September 27 an interruption occurred in the downward movement of Dominion of Canada long-term bond prices. For the past five weeks the tendency has been toward lower levels but for the three days ended September 25 the tone of the market improved and slightly higher prices ruled. Following this interval the market again weakened and prices dropped to a level approximating that of the preceding week. In consequence, the index number of Dominion long-term bond yields on the base 1926=100 eased from 83.4 for the week ending September 20 to 83.3 for the week ending September 27. Yields ranged from 3.71 to 4.12 with an average of 3.94 as compared with 3.64 to 4.30 and an average of 3.94 for the previous week.

INVESTORS' INDEX NUMBERS OF SECURITY PRICES
(1926=100)

A fractional advance of 0.9 points was registered for the Investors' index of 112 common stocks, this number being 99.5 for the week ending August 22nd, as compared with 98.6 for the preceding week and 87.6 for the same week last year.

Industrials mounted from 146.3 for the week of August 15th to 147.5 for the past week. This moderate gain was partly attributed to the higher prices of Oils issues and also to those of Consolidated Smelters and International Nickel, included in the Miscellaneous group. In 1934, this index was 121.3 for the week ending August 23rd. Losses in Power and Traction contributed to a minor decline in Utilities, placing this index at 48.2 for the week ending August 22nd, as compared with 48.3 for the week of August 15th. For the corresponding period in 1934, the index recorded was 52.4. Five companies located abroad moved upward from 122.4 for the week of August 15th to 125.5 for the following week. International Petroleum was responsible for the rise.

INVESTORS' INDEX NUMBERS OF SECURITY PRICES
(1926=100)

Common stocks showed little activity during the past week and the Investors' Index for 112 issues of this type declined from 98.1 for the week of August 29th to 46.3 for the week ending September 5th. The comparative index for the week of September 6th, 1934, was 86.3. Industrials, Utilities and Companies abroad followed the same movement, all registering minor losses. In the Industrial series, the drop in prices of Oils, Textiles and Clothing and Pulp and Paper more than counterbalanced gains in the other sub-groups and the index fell from 146.3 to 145.6. For the same week of 1934, this index was 120.4. Twenty Utilities dropped from 47.3 for the week ending August 29th to 46.3 for the following week. For the week of September 6th, 1934, the Utility Index recorded was 50.7. A loss of 0.6 points placed the index for five companies located abroad at 121.3 for September 5th as compared with 121.9 for the previous week and 103.0 for the corresponding week of last year.

INVESTORS' INDEX NUMBERS OF SECURITY PRICES
(1926=100)

Prices were generally firmer during the past week and the index for 112 common stocks was 103.5 for the week of October 31 as compared with 101.5 for the week of October 24 and 85.4 for November 1, 1934. The three groups in the Investors' series followed the same trend as the total with Industrials and Companies abroad showing moderate gains and Utilities registering a slight gain for the third successive week. All sub-groups in the industrial section were higher but Oils and Beverages were chiefly responsible for the index advancing from 154.8 for October 24 to 159.0 for October 31. The comparative index for last year was 120.2. Two of the three sub-groups in the Utilities were higher and the index was 46.4 for the week ending October 31 as compared with 46.3 for the previous week and 48.0 for the corresponding week last year. Influenced by the rise in price of International Petroleum the index for five companies abroad mounted from 125.0 for October 24 to 127.2 for October 31. This index was 104.9 for the same week in 1934.

INVESTORS' INDEX NUMBERS OF SECURITY PRICES
(1926=100)

Although steady advance of stock prices during the past month was impeded by profit taking at Montreal and Toronto on Thursday, the general index for 112 common stocks reached 106.7 for the week of November 7, a new high since April 2, 1931. The index was 103.5 for the week of October 31 and 87.1 for the corresponding week last year. 87 Industrials mounted from 159.0 for October 31 to 163.7 for November 7 and all sub-groups with the exception of Iron and Steel were higher. Twenty Utilities were less active than the other groups registering a gain of only 1.3 points and placing the index at 48.2 as compared with 46.4 for the previous week and 47.7 for November 8, 1934. International Petroleum and Brazilian were again responsible for the index for five companies located abroad mounting from 127.2 for October 31 to 130.7 for November 7. The comparative index for 1934 was 109.7.

WEEKLY INDEX NUMBERS OF DOMINION OF CANADA LONG-TERM BOND YIELDS.
(1926=100)

On November 4 subscription lists for a new issue of Dominion bonds were opened, and closed within a few hours. The loan was greatly over-subscribed and brokers who had applied for large blocks in anticipation of just such a situation were able to meet only a part of the demand. Brisk trading ensued, particularly in the new Dominion 3's. During the latter part of the week, attention was centred on the conversions as they offered a slightly higher return than other Dominion issues. Prices were firm, for offerings were light and quickly absorbed. The yields from Dominion long-term bonds tended downward during the week and showed a range of from 3.77 to 3.27 with an average of 3.50 for the six leading issues used in the index as compared with 3.80 to 3.33 and an average of 3.53 for the previous week. The index declined from 75.7 to 74.8.

Firmer prices developed with gains dominating the movement on the Montreal and Toronto Stock Exchanges and the general index for 112 common stocks advanced from 106.7 for the week ending November 7 to 108.7 for the week ending November 14. For the week ending November 15, 1934, the index was 89.4. In the Industrial series, five sub-groups were higher, with Canadian Industrial Alcohol "A & B", Consolidated Smelters and International Nickel showing pronounced strength and the index mounted from 163.7 for November 7 to 168.3 for November 14. The comparative index for 1934 was 127.0. Twenty utilities recorded a gain for the fifth successive week, the index being 49.6 for the week of November 14 as compared with 48.2 for the preceding week and 47.1 for the corresponding week last year. The decrease in the index for five companies located abroad from 130.7 for November 7 to 128.4 for November 14 is credited to the drop in price of International Petroleum. This index was 114.5 for November 15, 1934.

This index was 88.4 for November 29, 1934. In the Industrial section, Consolidated Smelters, International Nickel and Ogilvie Flour Mills showed the largest individual gains and the index advanced from 172.3 for the week ending November 21 to 173.2 for the week ending November 28. INVESTORS' INDEX NUMBERS OF SECURITY PRICES
(1926=100)

A reaction largely technical in nature resulted in the general index for 112 common stocks falling from 113.3 for the week ending December 12 to 110.8 for the week of December 19. This was the first pronounced decline since the week of October 10. The comparative figure for 1934 was 87.1. Eighty-seven Industrials lost 4.4 points and in this section, four sub-groups were higher and four were lower but the drop in prices in the alcohol group, Consolidated Smelters and International Nickel were chiefly responsible for the index receding from 180.5 for December 12 to 176.1 for December 19. For the week of December 20, 1934, this index was 124.4. Twenty Utilities followed the lead of Industrials and declined from 50.5 for December 12 to 49.4 for December 19. The index was 47.1 for the corresponding week in 1934. Five companies located abroad were 123.5 for the week of December 19 as compared with 125.5 for the previous week and 107.1 for the same week in 1934.

The range of yields was from 3.19 to 3.78 with an average of 3.45, a small decrease from that of the week ending December 13 in which the yields ranged from 3.23 to 3.82 with an average of 3.49. Volume was light with fluctuations confined within narrow limits for the greater part of the week and nothing of an unusual nature was reported.
